

## NEWS RELEASE June 2007

### Shanghai 2007

In a bid to create even more business in China Trio exhibited at the recent IAC show in Shanghai 13-16 June 2007.

Taking place at the Shanghai Everbright Exhibition & Convention Centre, the Trio booth generated an amazing interest from literally hundreds of visitors over the 4 day event. Previewing the very first prototype of our next generation of controllers for the first time in China caused quite a stir with our claims of the 'fastest Motion Coordinator in the world' bringing out countless flashing cameras and video cameras. The show also allowed our growing list of Chinese distributors a focal point to meet us alongside the many visitors with new applications to discuss. It really was a great experience to be selling in the Chinese market. The enthusiasm for using our technology is nice to see and the potential sales almost unbelievable!
