NEWS RELEASE

October 2006

This year the 2006 PACK EXPO International was held in Chicago at the huge McCormick place convention center.

Despite the enormity of the hall, it was filled to capacity. Just how big? PACK EXPO International featured over 1,600 companies utilizing over 1.2 million square feet of exhibit space. 50,000+ attendees with international customers from over 75 countries - a BIG success by any measure!

The show spanned 5 days from Sunday, October 29 to Thursday, November 2. Trio was there in full force displaying new products and technology controlling various mechanical actuators. PACK EXPO International features prominent companies such as Trio Motion Technology focusing on the latest developments in packaging technology and state-of-the-art advances in controls technology.

Trio's motion controls can be found in nearly every facet of the industry including converting machinery, materials handling, food packaging, and labelling.
